The North American Review for June opens with an article on "Harboring Conspiracy," by Prof. Henry Wade Rogers, who examines, in the light of international law, the diplomatic history of the United States and the national constitution, the question as to how far our government may and must go in suppressing plots against governments with which we are at peace. Henry D. Lloyd, in the same number of the Review, shows how every branch of production is coming under the control of "Lords of industry," corporations and monopolies.
